- Title: Don't Hack Me Bro
- Names:
    - Andrew Pavey
    - Liam Hoffmeister
    - Lorenzo Repenning
    - James Gallmeister
    - Tia Basak
    - Matthew Sadeik

- Project Tracker:
    - Bitrix24
        - https://b24-mrokgw.bitrix24.com/company/personal/user/13/tasks/?user_lang=en&current_fieldset=SOCSERV

    -
- VCS Repository:
    - https://github.com/jamgall/DevProjSrc
    - Link to the commit history. This can be checked to see each members contributions to the repository.
        - https://github.com/jamgall/DevProjSrc/commits/master
        - For Matthew Sadeik his contributions were mostly outside the repository. For example obtaining the dictionary files and creating the data model for the database.
- How to run the application:
    - Clone the git repo.
    - Run the ./config.sh file

- - ■ You can stop the configuration file after however many commits you feel is adequate.
  - ○ Run "node app.js" and navigate to "localhost:4000" and it should run.
